If a distance of 1 m is maintained

- School grounds

If a distance of 1 m is maintained

School transportation and public transit

Theatre and auditorium

If a distance of 2 m is maintained or if a physical barrier is present

Important: If a person tests positive for COVID-19, the wearing of masks becomes mandatory **at all times (including during physical activities)** for the entire class for 10 days. The health authorities will notify the school staff and the parents of the students concerned.

1. These guidelines do not apply to preschool students.
2. Any individual carrying out work at the school (e.g. guest speaker, science facilitator) is subject to the guidelines pertaining to wearing a procedural mask in the workplace.
3. Masks may be removed during physical activities.
4. If students from different groups gather in an indoor sports facility without practising a physical activity, they are then considered to be in a common area and they are required to wear their mask.

Rules pertaining to procedural masks complement the other health measures in place.
