

TOWING SERVICE FEE FOR PERMITTED ACTIVITIES (MAY 1ST TO JULY 31ST 2025)

DEFINITIONS

“**BREAKDOWN**” is when a vehicle comes to a complete stop due to a broken or defective part or because it has run out of fuel.

“**TOWING**” means coupling a vehicle to a tow truck and taking it to a location specified by the customer or the police. Towing starts when the initial tow truck arrives at the service location. It excludes all maneuvers required to position the vehicle properly for towing, which is known as “recovery.”

“**RECOVERY**” means all the maneuvers required to get a vehicle into the proper position for towing. Recovery may also involve retrieval of large quantities of lost cargo or large pieces of debris from the vehicle being towed. The following are not considered as recovery: normal pavement cleanup, cleanup of small amounts of debris, removal of a vehicle destroyed by fire but in relatively good condition, a vehicle abandoned on the shoulder, bumper realignment when towing is not required.
