

Hunting seasons in wildlife reserves

Table of contents

2022-2023 hunting seasons in wildlife reserves	3
---	----------

2022-2023 hunting seasons in wildlife reserves

Hunting dates are established based on the zone where hunting is permitted, the type of weapon used, the sex of the animal and its maturity.

Changes to the authorized periods and segments may be made at any time as required. It is your responsibility to abide by the terms and conditions in effect before you practice your activity.

Specifications on the hunting zones

A wildlife reserve may not offer daily access rights for small game hunting on certain days during a given period. For more information or to find out the opening dates for small game hunting, visit the Sépaq [website](#).

Migratory bird hunting seasons in wildlife reserves are the same as those in the federal migratory bird hunting districts in which they are located. Refer to the summary of Environment Canada's migratory birds hunting regulations.

During a season of antlered deer hunting, the holder of an [antlerless deer hunting licence \(random draw\)](#) may hunt antlerless deer in the location indicated on their licence. When antlerless deer licences (random draw) are issued for a wildlife reserve or ZEC, the licences for the zone are not valid in these territories and the licences issued for these territories cannot be used in the zone.

Ashuapmushuan (zone 28)

Species	Gear	2022 hunting season	2023 hunting season
Moose with antlers (10 cm or more) and calf, ruffed grouse, spruce grouse and snowshoe hare	Firearms, crossbow and bow Hare snare hunting is also permitted during the stay.
